General

Revise your prospectus to disclose the price that each selling securityholder paid for the securities being registered for resale. Highlight any differences in the current trading price, the prices that the Sponsor, private placement investors, PIPE investors, and other selling securityholders acquired their shares and warrants, and the price that the public securityholders acquired their shares and warrants. Disclose that while the Sponsor, private placement investors, PIPE investors, and other selling securityholders may experience a positive rate of return based on the current trading price, the public securityholders may not experience a similar rate of return on the securities they purchased due to differences in the purchase prices and the current trading price. disclosure.

2. In light of the significant number of redemptions and the unlikelihood that the company

will receive significant proceeds from exercises of the warrants

trading price. Lastly, please include appropriate risk factor

also disclose the potential profit the selling securityholders will

because of the disparity

earn based on the current

between the exercise price of the warrants and the current trading price of your ordinary

shares, please add a capital resources section to your prospectus that addresses any

changes in the company $\,$ s liquidity position since the business combination. If the

company is likely to have to seek additional capital, discuss the effect of this offering on $% \left\{ 1\right\} =\left\{ 1\right$

the company s ability to raise additional capital.

3. In the new capital resources section, discuss the fact that this offering involves the

 $\,$ potential sale of a substantial portion of shares for resale and discuss how such sales could

impact the market price of the company $\,\,$ s common stock. Your discussion should

highlight the fact that the selling securityholders identified on page 17, beneficial owners

of more than 60% of your outstanding shares, will be able to sell all of their shares for so

use.

4. Please disclose whether you entered into any forward purchase or other agreements that

provide certain investors with the right to sell back shares to the company at a fixed price

for a given period after the closing date of the business combination. If so, please revise to

discuss the risks that these agreements may pose to other holders if you are required to

buy back the shares of your common stock as described therein. For example, discuss how

such forced purchases would impact the cash you have available for other purposes and to

execute your business strategy.

5. For each of the securities being registered for resale, disclose the price that the selling

securityholders paid for such securities.

6. Disclose the exercise price of the warrants compared to the market price of the underlying

securities. If the warrants are out the money, please disclose the likelihood that warrant

holders will not exercise their warrants. Provide similar disclosure in the prospectus $% \left(1\right) =\left(1\right) +\left(1\right) +\left($

ability of your company to fund your operations on a prospective basis with your current

cash on hand.

7. We note the significant number of redemptions of your common stock in connection with

your business combination and that the shares being registered for resale will constitute a $% \left(1\right) =\left(1\right) +\left(1\right)$

considerable percentage of your public float. We also note that most of the shares being $% \left(1\right) =\left(1\right) \left(1\right) +\left(1\right) \left(1\right) \left(1\right) +\left(1\right) \left(1$

registered for resale were purchased by the selling securityholders for prices considerably

below the current market price of the common stock. Highlight the significant negative

8. Include an additional risk factor highlighting the negative pressure potential sales of

shares pursuant to this registration statement could have on the public trading price of

your common stock. To illustrate this risk, disclose the purchase price of the securities

being registered for resale and the percentage that these shares

currently represent of the

total number of shares outstanding. Also disclose that even though the current trading

 price of your common stock is significantly below the SPAC IPO price, the private

investors have an incentive to sell because they will still profit on sales because of the $\,$
